1.0 NTR WEB APPLICATION MODULES

1.1 Online data access and Remote data capture
Each SDP is given right to access its own data and is able to enter data remotely at its site via the NTR Web Application

1.2 Real time report
Reports are generated on a real time basis based on data entered via the online data access and Remote data capture module.

1.3 Data Standard
These documents contain definition of all variables collected in all the NTR registries.

1.4 Maintenance
This module allows user to change their password. Users are encourage to change their own password after every three months for security reasons.

1.5 Access Control
Only authorized users can gain access to a system. Depending on the role of user, different users have different access rights to the application, i.e. some may view data only but not edit data, some may view and edit data, etc.

Timer – On top of each application, timer has been set from 60 minutes and will decrease each time the application left idle. If the application is left idle for more than 60 minutes, the application will be logged off automatically.

Picture 1.1 *Timer*

2.0 SECURITY

Each authorised user is required to read through, understand and sign The Security Policy for NTR Web Application before being authorised to access the application. This is to ensure that users play an active role in ensuring security of data at their level.

2.1 Policies and Practices as follows

As a good security practice, you are <u>strongly advised</u> to:

Keep your password confidential!

- **Avoid** sharing or divulging your Password to anyone. This includes any person who may appear to represent or work for the Registry. Our administrator do not request for your password at any time.
- **Avoid** using the same Web Application Password for any other web-based services such as for e-mail or for Internet Service Provider login.
- **Avoid** choosing a Password that is easily anticipated by a third party, like your NRIC number, telephone number, date of birth, etc. You should select a unique Password to make it difficult for anyone to anticipate.
- **Avoid** writing down or "saving" your Password on your browser or any other software. Memorizes your Password.
- If you suspect your Password may have been compromised, change your Password **<u>immediately</u>**.

Tips: *Your password is what tells the system that you are who you say you are. Because your password is like a key to your account, you need to safeguard it. Anyone who has your password can pose as you. Therefore, you may be held responsible for someone else's actions, if they are able to get your password. Do not record your passwords down, memorise them!*

Ensure you are accessing the correct website!

Never access the website via a hyperlink from an e-mail. Always enter the correct website address yourself, which is https://www.macr.org.my/entr/.

Only access Web Application using a secure and trusted computer!

- **Never** access your Web Application on computers / devices which you have doubts with regard to security, such as those located in public places. If you have to use such computers (for example, when you are outside the office), change your password once you have access to a secure computer.
- Keep your operating system (eg. Microsoft Windows) and Internet-related software updated with the latest security patches.
- Protect your computer from viruses and malicious programs with anti-virus software and firewalls where possible. Always <u>update</u> your anti-virus software with the latest virus signatures.
- Always log out your Internet session by clicking on the "logout" button whenever you leave your computer, even for a short while. Do not simply close the browser window when you wish to end the Web Application session.

3.0 HOW TO ACCESS NTR WEB APPLICATION

1. Register the centre as Source Data Provider with NTR Registry, contact NTR Manager at Tel: 03-2681 5948 or email ntr@acrm.org.my
2. Fill in the authorization list form for the purpose of access control and sign the security policy form to receive a username and password.
3. Access to ACRM Website at http://www.acrm.org.my

Welcome to ACRM
The ACRM (Association of Clinical Registries, Malaysia) was established for the purpose of facilitating the set up and maintenance of clinical registries and databases in the country. Registry databases include information concerning demographics, diagnosis, treatment history and outcomes. A variety of output can be generated from the information collected.
In Malaysia however, there have been a lot of debatable issues surrounding clinical databases. The common problem seems to be in terms of collecting and sharing the data as well as database maintenance. Most institutions collect data for their own use. The majority of them have reservations with regards to data sharing even if it is for a common good. This is due to lack of clear policies on data sharing. These issues will remain unresolved unless measures are taken. Thus spelling the need to standardize (in both content and quality) and share databases.
This association was established to meet to those needs. It will be used as a platform to set up and maintain clinical databases for key diseases in Malaysia. It also aims to be the one stop portal where users can have access; physically and virtually to majority of clinical databases in Malaysia.
Register with us!
If you are currently involved or maybe planning to set up a clinical register or maybe interested in clinical databases, please send us an email at: contact@acrm.org.my
We also welcome participation from both individuals as well as organizations keen to link up with us!
Sign up as ACRM member today !!

NATIONAL TRANSPLANT REGISTRY
The National Transplant Registry (NTR) collects information about patients who had undergone organ or tissue transplantation. The information allows us to estimate the magnitude of transplant activity in the country. Such information besides being useful to practitioner of transplantation is also useful in assisting the MOH, Non-Governmental Organizations, private providers and industry in the planning and evaluation of transplant services.

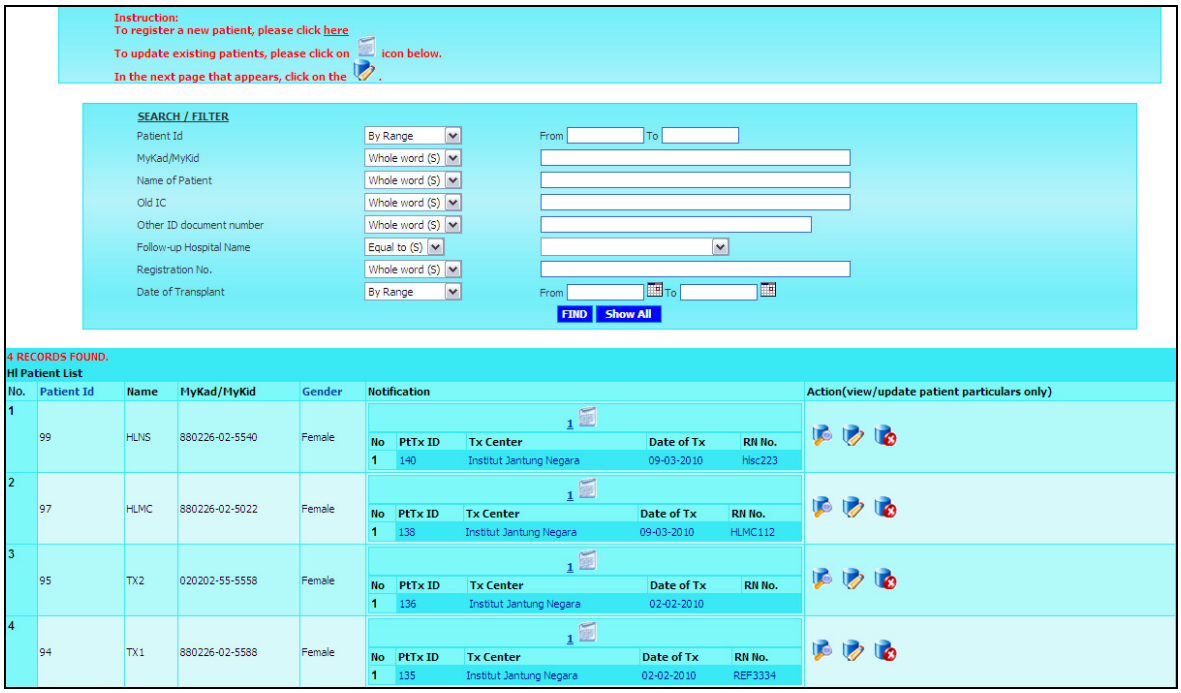
4.0 STEP BY STEP PROCEDURE IN USING NATIONAL TRANSPLANT REGISTRY (NTR) FOR *HEART & LUNG TRANSPLANT* WEB APPLICATION

4.1 Heart & Lung Transplant

Upon selecting Heart & Lung Transplant application link on the application selection page, user will be directed to Patient List.



Picture 1.7 *Patient Lists for Heart & Lung Transplant*

4.1.1 Navigation Toolbars

On top of Heart & Lung Transplant page, there are 8 menu navigation toolbars which include:

i. Main Menu
ii. Patient List
iii. New Patient Data Entry
iv. Statistics
v. Data Download
vi. Change Password
vii. Help
viii. Log Out

Picture 1.8 *Menu Navigation toolbars for Heart & Lung Transplant*

User's can only view parts of this menu navigation toolbars depends on their group that has been assigned to them.

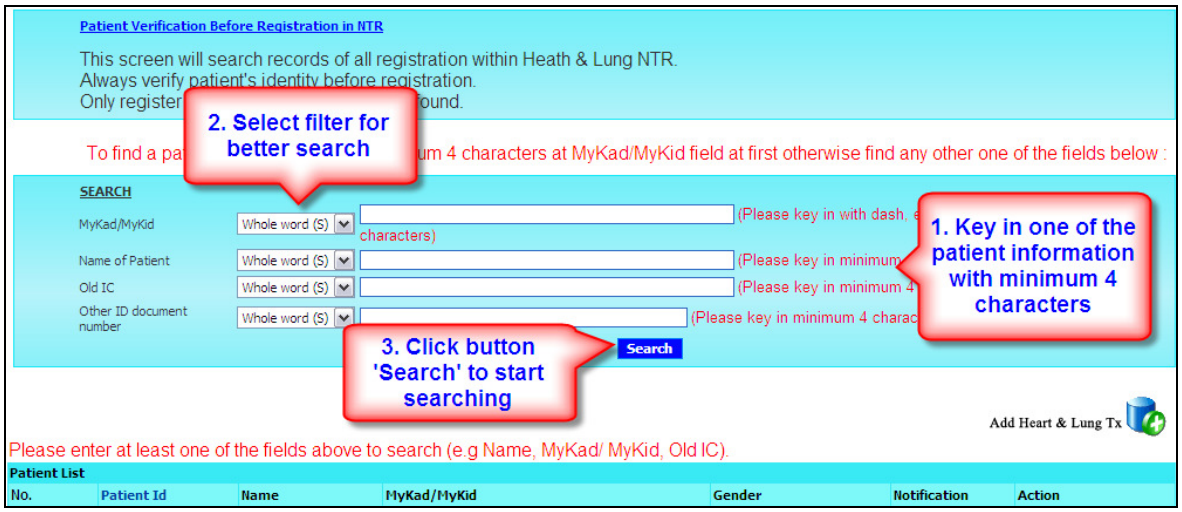
4.1.2 Main Menu

Navigate to Main Menu. (*See Picture 1.6*)

4.1.3 New Patient Data Entry

Before registering a patient, please verify that patient has not been registered in the system before by clicking on **New Patient Data Entry** tab.

Picture 1.9 *New Patient Data Entry Tab Menu*



Patient Verification Before Registration in NTR
This screen will search records of all registration within Heath & Lung NTR.
Always verify patient's identity before registration.
2. Select filter for better search
SEARCH
MyKad/MyKid
